

FACE 3D INSTALLATION

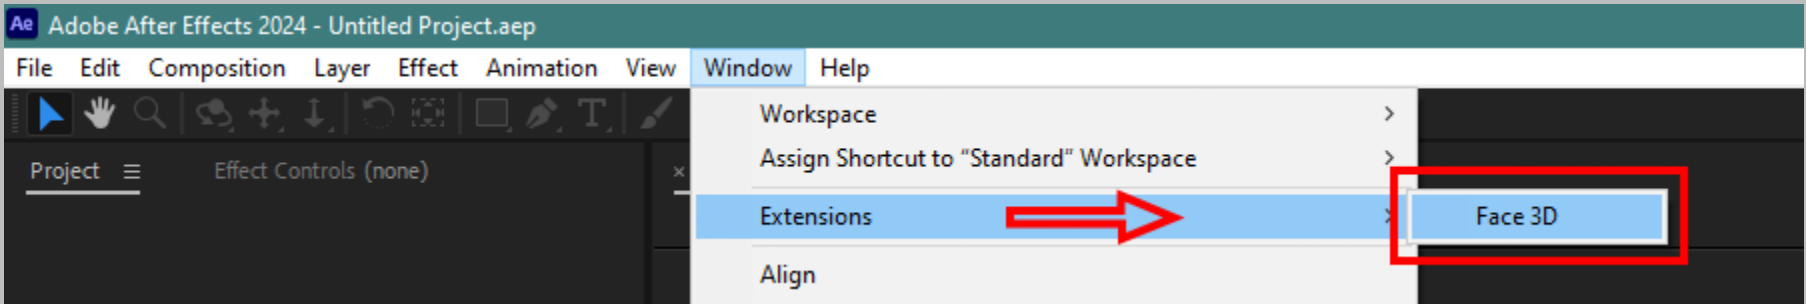

The easiest way to install and license is by using the [aescrpts + aeplugins manager](#)

To install a trial you can select 'Add Trial' from the 'Account' menu

The alternative way to install is by using the [ZXP Installer](#)

Open the installer and drag and drop the "Face 3D" zxp file to install

Restart After Effects after installation

This plugin used Blender for background prosess.To make it work you need to install the completely free app Blender. Go <https://www.blender.org/> and download Blender for your Operating System.

Make sure your Blender application is working properly

Blender Default installation Folder

WIN -- C:\Program Files\

MAC -- Applications/

On the Face 3D UI panel, you will see a blender icon with a green indicator. This means that Face 3D and Blender are in sync.

If the indicator is red, click the Blender icon and select the Blender application from the dialog box.

Also Make sure 'Allow Scripts to Write Files & Access Network' is checked

GO Top-Menu/Edit/Preferences/Scripting & Expressions.../Allow Scripts to Write Files & Access Network
